PROJECT DESIGN PHASE-I

PROPOSED SOLUTION

DATE	08-10-2022	
TEAM ID	PNT2022TMID33933	
PROJECT NAME	IoT Based Gas Leakage Monitoring and Alerting System	
MAXIMUM	2Marks	
MARKS		

S.NO	PARAMETERS	DESCRIPTION		
	Problem	To protect people from accidents caused due to leakage of gas. Many people are unaware of leaking of gas		
1.	Statement			
	(Problem to be			
	solved)			
2.	Idea / Solution	So, to solve this problem, we can use sensors to monitor the level of the gas		
	description			
3.	Novelty /	By the use of modern sensors it is effortless to		
	Uniqueness	detect the level of gas		
4.	Social Impact /	it ensures the safety and well being of people		
	Customer			
	Satisfaction			
5.	Business Model	Through IoT a sensor is built which constantly		
	(Revenue Model)	measures the amount of gas which is beneficial for restaurants, factories and so on		
6.	Scalability of the	Using mobile device allows for detecting the level of gas and gives warning by which preventive steps can be taken		
	Solution
